PROJECT

RideCalm – Smart Train Seat Occupancy System

- Developed an IoT-based smart train seat monitoring system designed to provide real-time seat occupancy tracking for passengers. The project integrates ESP32 microcontrollers, load sensors, Wi-Fi/Bluetooth communication, and embedded systems to improve commuter convenience and optimize seat utilization. Focused on scalable architecture, cost-effective implementation, and efficient real-time data transmission through smart connectivity solutions.

Technologies Used:

- Python
- Java
- Microsoft Excel
- Microsoft Azure
- ESP32
- Microcontrollers
- Load Sensors (FSR / Load Cells)
- Wi-Fi Communication
- Bluetooth Communication
- Embedded IoT Systems
- Mobile Application Interfaces
- Artificial Intelligence
- Data Analytics
- Machine Learning
- UI/UX Design Technologies

TECHNICAL SKILLS

- Python(Normal)
- Java(Basics)

SOFT SKILLS

- Leadership & Team Collaboration
- Adaptability
- Creative Thinking
- Time Management

TOOLS & PLATFORMS

- Microsoft Certified: Azure Fundamentals (AZ-900) – [July,2025]

AREA OF INTEREST

- Game Developer
- UI/UX Developer
- Photography
- Videography
- Editing

CERTIFICATION

- Microsoft Certified: Azure Fundamentals (AZ-900) – July 2025
- Microsoft Office Specialist Certification – Power Soft Computers (2019)
- AI For All – AI Appreciate Stage Program by Intel and CBSE
- Cyber Hygiene Practice Workshop Certification

ACHIEVEMENTS

- Received Certificate of Appreciation for organizing DIGINOVA'25 conducted by Trinitysoft Solutions Ltd
- Successfully contributed to a corporate-level technical event coordination and management initiative
- Built an IoT-based Smart Train Seat Occupancy System focused on real-time monitoring and commuter convenience
